Processor: Intel Celeron, Pentium 4

Memory: 1024 MB RAM

Graphics: Nvidia Geforce GTX275

DirectX: Version 9.0

Storage: 1 GB available space

Additional Notes: Recommended DX11

English

this game has to have the \u2665\u2665\u2665\u2665\u2665iest controls for a controller why in the holy tofu I can't reverse and why do I become a fidget spinner if I try to but yeah decent game nice to play when you are waiting 6000 hours for gta 5 to download. the game itself is a fun Idea but other than that it's pretty much downhill this game is so buggy I would dare to say it is simply unplayable without spending a copious amount of time troubleshooting to try to get this game to work when the game works it is fun but as the game never does I feel I can't recommend this game to anyone
