apt-file search libusb.h > !info libusb-1.0.21 xenial libusb-1.0.21 (source: libusb): userspace USB API library. In component

main, is optional. Version 1.0.21-0ubuntu2 (xenial), package size 194 kB, installed size 1056 kB What is xserver-xorg-dev needed for? if I want to run a.run file from a PPA. MoleMan: you can't run a.run from a ppa, you'll have to build from source ok MoleMan: sometimes packages have the X11 binary files in a subdirectory of the debian directory MoleMan: there's the "desktop" package, from which it pulls the binary files yes, a lot of files are there but none of them have any libraries I could use. MoleMan: is this the kind of thing you're doing? MoleMan: maybe you can try using a ppa for it I tried that too. MoleMan: not a good idea then deb focal main deb-src focal main am I going to get pointed to /ignore? maybe give us the url? what's that for? so that you can 82157476af
